

EMBLEM 2 - CYCLE OIL

EMBLEM 2-Cycle is a blend of highly refined base stocks and special additives to meet the requirements of most 2-cycle engines. It is designed to minimize spark plug fouling, port plugging, ring sticking, cylinder wall scuffing, preignition, corrosion, and piston varnish. It can safely be used in all 2-cycle engines such as snowmobiles, motorcycles, chain saws, lawn mowers, motor scooters, garden tillers and outboard engines, (except where BIA certified oil is recommended).

Typical Properties

Viscosity, SUS @ 210 °F	65
Viscosity, SUS @ 100 °F	465
Viscosity Index	90
Gravity °API	27-29
Flash Point COC °F	450
