

EMOLUBE 341

Emolube 341 is a heavy asphaltic prediluted open gear compound for special, heavy loaded, slow speed applications. It can be applied by either brush or spray and serves well through automatic applicators.

Emolube 341W is the winter grade and contains a fast evaporating diluent that eases application in extremely cold conditions but quickly reverts to what would be a normal Emolube 341.

Typical Properties

	341	341W
Viscosity, SUS @ 100 °F Finished Blend	500-750	200-400
Timken # OD Load Min.	50	50
Shell 4 Ball	Pass	Pass
Copper Strip	Pass	Pass
