

EMBLEM HEAT TRANSFER OIL

EMBLEM Heat Transfer Oil as the name implies is used to impart heat to a product. It is heated in a closed system and by pumps is circulated through coils or jackets to heat a product. One of the main uses is in black top asphalt plants. Heat Transfer Oil is formulated from highly refined, high viscosity base stock neutrals and specialized anti-oxidants.

Typical Properties

Viscosity, SUS @ 210 °F	45
Viscosity, SUS @ 100 °F	200
Viscosity Index	75
Gravity °API	28-30
Flash Point COC °F	390
Fire Point COC °F	445
Oxidation Inhibited	Yes (2800 hrs.)
