

EMBLEM RUST PREVENT 70K

EMBLEM Rust Prevent 70K is a specially formulated rust preventive that leaves a thin oily coating to protect the part from rust. It has the ability to neutralize acid left from fingerprints. It has a higher flash point so it can be used in hazardous areas. The viscosity is adjusted so it can be pumped through spray nozzles with realitive ease. **EMBLEM** Rust Prevent 70K can be applied by brush, spray or dipping.

Typical Properties

Viscosity, SUS @ 100 °F	95
Gravity °API	26.8
Flash Point COC °F	285
Fire Point COC °F	320
Pour Point °F Max	- 25
