

EMBLEM RUST PREVENT LW

EMBLEM Rust Prevent LW is a low odor rust preventative that is a formulation of a number of special additives. It contains an odorless mineral spirits diluent that after evaporation leaves a protective coating that does not become hard or brittle. Unlike most other products, this one has the ability to absorb any microscopic water that may be on the metal so that it is not being covered over. It also has an additive that will neutralize the acid left from fingerprints. Rust Prevent LW can be sprayed, brushed or dipped.

Typical Properties

Viscosity, SUS @ 100 °F	31.2
Gravity °API	47.4
Flash Point COC °F	140
Pour Point °F Max	- 50
% Ash	0.4

ASTM D-1748 Humidity Cabinet

Time to Failure		
	Sand Blasted Panel	Polished Panel
Straight	96 hours	1440+ hours
2:1 w/Stoddard Solvent	24 hours	1000 hours
10:1 w/Stoddard Solvent	-	24 hours
