

EMBLEM R.R. JOURNAL OIL

EMBLEM R.R. Journal Oil is a premium grade, high viscosity index, low pour product meeting the specification AAR-M-963-79. This product is formulated with a heavy duty additive which will protect new bearings during the critical break-in period and minimize friction in heavily loaded bearings. In addition to the rust and corrosion protection afforded by the heavy duty additive, it is further enhanced with detergency characteristics which help to prevent any buildup on the bearings. **EMBLEM** R.R. Journal Oil is formulated for year-round use and is recommended for plain journal waste saturation or pad lubrication or free oiling.

Typical Properties

Viscosity, SUS @ 100 °F	285
Viscosity, SUS @ 210 °F	53.0
Viscosity Index 100 Min.	109
Gravity °API	29.3
Flash Point COC °F	430
Fire Point COC °F	470
Pour Point °F	- 25
