

EMBLEM UNICUT SSC

EMBLEM Unicut SSC has been formulated to handle the difficult task of cutting stainless steel. It is compounded with active sulphur, lard oil and chlorine. The use on other ferrous metals or nonferrous metals could result in staining but would otherwise give excellent results.

Typical Properties

Viscosity, SUS @ 100 °F	82
Gravity °API	28.9
Flash Point COC °F	295
Fire Point COC °F	335
Pour Point °F	+10
Active Sulphur %	0.8
Chlorine %	0.6
Lard Oil % wt.	13.0
