

EMBLEM WAR-ON-RUST

EMBLEM War-on-Rust is compounded as an excellent corrosion preventative. It is effective in protecting bright, ground or highly polished steel surfaces.

EMBLEM War-on-Rust is a solvent compounded product containing a combination of additives that deposits flexible long-lasting coating that neutralizes the acid of fingerprints and lifts microscopic moisture. This is an essentially dry film that protects steel in storage against high humidity, salt water fog, acid fumes, etc.

EMBLEM War-on-Rust can be sprayed, brushed or dipped.

Typical Properties

Viscosity, SUS @ 100 °F	33.0
Gravity °API	45.6
Flash Point COC °F	145
Pour Point °F	- 45

HUMIDITY CABINET (ASTM D-1748)

Time to Failure - Sand Blasted Panels 100 hours

Time to Failure - Polished Panels 1440 + hours
