

EMBLEM MOLY EP GREASE

Emolube 292 is a Moly Extreme Pressure grease formulated from high quality lithium soaps, high quality refined petroleum oil, plus the addition of molybdenum disulfide. The percentage of moly is very critical and thorough research has been done to insure that this grease carries the correct percentage of moly to produce optimum results. The moly additive provides extra lubrication for vital, hard to lubricate applications where boundary lubrication is encountered. This is an excellent grease for all around lubrication in farm, mining, construction, automotive and industrial applications.

Typical Properties

N.L.G.I. GRADE	2
Worked Penetration	265-295
Dropping Point oF Min	350
Timken OK Load Min.	40
Rust D-1743 Pass	1,1,1
% Moly	3
